

MERGING+PLAYER Updating Roon.

The Roon OS software should be updated on a regular basis, to take advantage of improvements and new features.

- In order for the update to be performed make sure that the MERGING+PLAYER has an Internet connection.
- Open the Roon Remote and go to the Settings>"About" page (top right corner of the Settings window).
- A message will be displayed in the "This PC" and / or "Core" section if updates are available.
- Press the *Update* button.
- Once this update is done, relaunch Roon Remote and return to the Settings>"About" page and again press the *Update* button if required.
- After Roon relaunches the RoonOS will then update to the latest version available
