

AES67 - RAVENNA devices interoperability

Merging Technologies Devices compatibility :

	RAVENNA	AES67
MassCore	V	V
MT RAVENNA ASIO	V	V ¹
Merging Audio Device driver	V	V
MT VAD Standard	V	V
MT VAD Premium	V	V
MT Horus / Hapi / Anubis	V	V

1: RAVENNA ASIO driver is compatible with AES67 since V11. Previous versions are only compatible with RAVENNA networks.

SAP Connections

Merging devices are capable of handling SAP connection protocol, no additional tool required.
Sources are always published in both SAP and Ravenna/Bonjour protocol, and Sinks can connect to SAP sources.
But such connection has to be made manually in the devices advanced pages (not handled by ANEMAN or Easy Connect)

Merging Technologies Software Devices requirements :

Software device	Requirement
MassCore	Requires a PTP Master on the network
MT RAVENNA ASIO	Hapi or Horus must be present in the setup (for PTP clock)
Merging Audio Device driver	Hapi or Horus must be present in the setup (for PTP clock)
MT VAD Standard	Requires a PTP Master on the network
MT VAD Premium	Hapi or Horus must be present in the setup
